DIELECTRIC NIPPLES

Properly Connect Different Metal Piping With Matco-Norca Dielectric Products

When connections are made between pipe or tube of dissimilar piping materials, Galvanic Corrosion (electrolysis) will occur which will cause deterioration of the joint.

Matco-Norca Dielectric Nipples and Unions are a low cost, efficient and permanent method of preventing deterioration of the pipe connections and stray induced electrical currents.

Applications include water, steam, oil and gas in commercial, industrial and maritime environments, as well as HVAC uses and water processing tanks.

Matco-Norca Dielectric Nipples meet ASTM F-492-95 and are temperature rated to 110°C/230°F.

DNTT

THREAD X THREAD

Product Number	Size	Carton Quantity	
		Inner	Master
DNTT04212	3/4" x 2-1/2"	25	300
